

2019-2020 HDFS Curriculum Checklist

Early Childhood Option

In the HDFS program, you'll address human development across the lifespan and gain the knowledge and skills you need to help improve the human condition. This may include intervening during crises, preventing future crises, helping people access resources, and advocating for changes in the systems that affect the lives of those in need. You can also focus on supporting young children and their families in early childhood settings.

Few careers offer as many opportunities to directly and profoundly impact lives. With an HDFS degree, you'll be ready for professional work or graduate study in fields such as education, HDFS, social work or public administration.

The Early Childhood option prepares students to promote lifelong development, learning, and wellbeing of children and families. Through a focus on the early childhood period from prenatal through age 8 years, students examine dynamics among children, families, schools, communities, and cultures that have lasting impacts throughout life. Practicum and internship experiences prepare students to work directly with children and families in preschools, Head Start programs, child care, early intervention/ early childhood special education, or parent and family support. Graduates also create and implement prevention and intervention programs, and pursue graduate study in fields such as education, special education, counseling, human development and family science, psychology, sociology, and social work.

HDFS Program Requirements:

- OSU Graduation Requirements
- Baccalaureate Core
- HDFS major/option courses
- All courses required within the major including pre-requisites MAY NOT be taken S/U and must be completed with a grade of C- or higher
