

B.S.- Human Development Family Sciences (HDFS)

COCC Transfer Guide

General HDFS Option

In the HDFS program, you'll address human development across the lifespan and gain the knowledge and skills you need to help improve the human condition. This may include intervening during crises, preventing future crises, helping people access resources, and advocating for changes in the systems that affect the lives of those in need. You can also focus on supporting young children and their families in early childhood settings.

Few careers offer as many opportunities to directly and profoundly impact lives. With an HDFS degree, you'll be ready for professional work or graduate study in fields such as education, HDFS, social work or public administration.

The HDFS general option enables you to take an interdisciplinary approach to families and human development across the lifespan within the contexts of school, work and communities. It will prepare you for careers in schools and in the helping professions, or will position you to pursue advanced academic degrees in a variety of fields. It offers tremendous flexibility and is especially beneficial if you also seek a related major such as ethnic studies, pre-nursing, psychology, sociology, Spanish or public health.
