BS- NATURAL RESOURCES

SPECIALTY OPTION: FISH AND WILDLIFE

Students who graduate with a BS degree in Natural Resources from OSU will learn to integrate technical field or laboratory skills with analytical skills to solve critical natural resource problems. The curriculum is designed to help students acquire knowledge about a range of natural resource issues, work in interdisciplinary teams, and deal with social and political aspects of resource management.

Students will acquire knowledge in biophysical sciences, social sciences, math and statistics. They will learn holistic resource management approaches that emphasize the interconnectedness of humans and the environment. In addition, students will develop a toolbox of resource management skills such as communication, collaboration, analysis, assessment and planning. They will explore the conservation and management of key resources which include fish and wildlife, land and water resources, and a wide range of ecosystems from forests to rangelands. A disciplinary depth in a focused area is developed through a required specialization option. Students may choose from a number of pre-approved options, or create an individualized (student designed) specialization option.

FISH AND WILDLIFE CONSERVATION

This option prepares students for a career in the broad arena of natural resource and wildlife conservation. It emphasizes understanding the relationship between animal species and their habitat requirements and the ability to apply this knowledge to the management of ecosystems as a means of conserving fish and wildlife.

Minimum of 37 credits is required with at least 20 upper division credits.

To complete a Bachelor of Science (BS) in Natural Resources students must complete the following degree requirements:

- OSU Graduation Requirements
- Baccalaureate Core
- Natural Resource Major Requirements
- Specialty Option Requirements

OSU Graduation Requirements:

Students pursuing a degree at OSU must meet the following requirements in addition to program and college requirements.

- 180—total number of credits required to graduate from OSU
- 60—number of upper division credits required (300-400 level courses)
- 135—maximum number of credits that will transfer from a community college
- 45 of last 75 credits must be OSU credits
- Maintain a 2.0 or better university GP

Bacc Core Requirements

All Skills and Perspectives are completed with an AAOT. If student does not have an AAOT they can use the COCC Bacc Core Guide to pick out course needed to meet the Skills and Perspectives requirements.

NOTE: Up to 6 Credits of appropriate internships, projects or study abroad may be used to fulfill credit requirements in this option as approved by petition	

Degree Planning Notes:

- Transfer Admissions Advising osucascades.edu/admissions/admissions-advising
- Consider applying for Degree Partnership Program (DPP).
- Use OSU-Cascades major webpages to find more resources to plan classes and when to transfer.
- Students completing an AAOT should use this guide to help you select and plan classes and requirements
