

## Student Fee Committee

11.15.16

- Jordyn calls the meeting at 4:33pm
- Moment of positivity (round table)
- Motion passes to approve meeting minutes of 11-8
- Three big questions SFC needs to answer:
  - How much is my fee?
    - What is the maximum we think this should go to over the ten years?
    - How high are you willing to take your fee?
  - What do you expect to get for that?
    - What are the services/facilities that students would like to get from this fee?
  - Once we define what we can afford, there will be some physical amenities that come out of that. This is where will decide how to use the space.
- OSU Cascades is unique, we are in the mountains with both traditional and non-traditional students and starting from the bottom up- with not many resources.
  - UC Merced is an interesting comparison because they are using fees to fund building, these could be examples of how and why these would be great to learn from
  - Carla asks about the funding channels- how much of fee
  - UC-Davis has a campus expansion fee
  - OSU used to have a green fee to fund recycling programs
- LOOK into the Disability Services in Budget ----> 2,500 (Investigate this)
- What we want:
  - Health services
- What is state funded: library, public safety, bookstore
- BRAINSTORM (Insert Picture)

- What information do we need to collect now?
- TAKE THE LIST OF SERVICES- ADD TO IT. AND RANK PRIORITY.
- Figuring out the range of fees students feel comfortable with
- Conducting research about currently operating facilities
- Taking time during office hours and explore other campus websites (the extremes, what we love and what we wouldn't want to be in)
